Part of the Atlas Copco Group

CP142 - better than ever

The cost-efficient CP142 is the smallest Dynapac pneumatic tyred roller. This machine shares many of the features that make Dynapac a strong and reliable partner.

Now, we have made a number of updates to make it even better!

All machines are now equipped with Cummins QSB 3.3 T3A engines with an output of 74 kW (99 hp). The large engine hood makes it easy to carry out maintenance.

The muffer and exhaust pipe are hidden under the engine hood for the best possible visibility backwards

With the new instrument panel, all indicators and switches are easy to reach.

The new ergonomic F/R-handle, located on the right side of the operator's seat, makes operation smooth and easy.
